Professional Summary

Computer Science graduate with professional experience at EdgeVerve, proficient in Python for transaction and backend verification. Committed to building accurate, reliable software in team-driven environments. Skilled at analyzing complex processes, identifying discrepancies, and ensuring system reliability. Eager to contribute to innovative projects and continuously enhance technical expertise.

Work Experience

EdgeVerve Systems Limited (Infosys)

Sep 2025 – Dec 2025

Systems Engineer – Finacle Core Banking Product

Hyderabad, India

– ISO 8583 Transaction Validating & Testing (GTBank Sierra Leone)

- * Validated **500+ ISO 8583 financial transaction messages** for GTBank Sierra Leone, ensuring correct field formats, response codes, and switch-to-core banking integration.
- * Executed and verified transactions using **Python scripts**, ensuring accurate account details, seamless transaction flow, and proper switch-to-core banking integration.
- * Executed complex **Oracle SQL queries** to verify customer data, account entries, and transaction postings in backend databases.
- * Used **Linux commands** to analyze application logs and trace transaction failures at switch and core levels.
- * Monitored and debugged **Kubernetes pods and services**, identifying issues through log inspection and service status checks.
- * Performed extensive **functional and regression testing** to ensure release stability and system reliability.
- * Collaborated with cross-functional teams including developers, infra, and banking domain experts to resolve transaction-level issues.

Technical Skills

Programming Languages: Python, C#, SQL

Frameworks: Django

Web Technologies: HTML, CSS, JavaScript

Tools & Platforms: Finacle, Oracle DB, Linux, Kubernetes

Core Concepts: OOP, DBMS, Data Structures

Personal Projects

Plant Disease Recognition Using Deep Learning (GitHub)

April 2025

TensorFlow, Keras, YOLOv5, ResNet50, Flask, HTML/CSS/JS

- * Built a plant disease recognition system using the PlantVillage dataset (50K+ images), achieving 97% accuracy using ResNet50 and YOLOv5 for real-time leaf detection.
- * Fine-tuned ResNet50 with TensorFlow and Keras and deployed the model using a Flask web application for live predictions.
- * Designed a responsive UI using HTML, CSS, JavaScript, and JSON for seamless user interaction and real-time result display.

Certifications

- Python Programming - Besant Technologies / June 2025
- AI/ML Internship – BlackBucks Engineers / May 2025
- Python Full Stack Development Internship – IIDT BlackBucks / Apr 2024
- AWS Cloud Basics - Coursera / Mar 2024

Education

Geethanjali Institute of Science and Technology

Nov 2021 – May 2025

B.Tech, Computer Science and Engineering (AI and ML)

CGPA: 7.26 / 10.00
